Three Genuine Good Roses as Shown in Colors on Cover Page 1

The Beautiful Flesh-Tinted Garden Rose

MAIDEN BLUSH

(W. R. SMITH)

Grand New Garden Rose. A most promising Summer Bedding Rose with beautiful, firm, glossy foliage, quite like Maman Cochet in appearance; very vigorous in growth, with flowers of heavy texture. Color white, shading to pink. Succeeding admirably in open ground. Produces immense blooms on long stiff stems; hardy with light protection. One of the very best Garden Roses we have. The buds and flowers are exceptionally fine. **Price, strong one-year plants, 20 cents each, three for 50 cents; two-year plants, 40 cents each, three for \$1.10.**

BLUMENSCHMIDT

(Hybrid Tea.) Pure citron-yellow, outer petals edged tender rose, a sport from Franzisca Kruger, which it resembles in form, and has a more vigorous growth. Winner of three first premiums. **Price 20 cents each; three for 50 cents, postpaid; two-year-old plants, 40 cents each; three for \$1.10.**

Newest Red Rose

RHEA REID

This is considered by experts to be the finest Red Rose in existence, surpassing even the well-known favorite American Beauty, which until the advent of this, the latest debutante in the Rose world, had no rival. Rhea Reid is an offspring of American Beauty, which fact alone would place it right in the front rank along with its hitherto unrivaled parent. Its superiority over American Beauty is due to the following great essentials: It is fully as large, is as double as Bridesmaid, as fragrant as La France, as continuous in bloom as The Bride and a much darker and richer red than the American Beauty, as the illustration on the first page of this catalogue fully demonstrates. **Strong, one-year-old plants, 20c, 3 for 50c; two-year-old plants, 40c, 3 for \$1.10.**

Our Brilliant Collection of Hardy Phlox Shown in Colors on Fourth Page of Cover

Hardy Phlox is one of the most important of all the hardy plant group. A judicious selection of plants, with care, will give a wealth of bloom from early spring until late fall. Their wants are few, but they well repay any care and labor bestowed upon them. The varieties and improvements yearly produced are legion, but the following list has been carefully culled, and comprises only the very best varieties in their different shades and colors that are to be had. Our collection of Phlox has taken special prizes wherever shown.

PRICE 10 CENTS EACH, ANY SIX FOR 50 CENTS.

- 1 **White Lady**—Pure white.
- 2 **Coquelicot**—Probably the brightest colored variety yet sent out. A bright clear scarlet, large trusses. By far the best of its color.
- 3 **Bridesmaid**—Pure white with a large crimson eye.
- 4 **Etna**—This is without doubt the grandest red variety in our collection. The lithograph on fourth page of cover gives but a faint idea of the rich color and size of trusses.
- 5 **Pantheon**—Large, clear deep bright pink with faint halo; a charming variety.
- 6 **Eclaireur**—Clear rosy-magenta; with large lighter halo; large florets, and magnificent bedder.

VERY IMPORTANT

Before ordering read the following:

First of all—Tell us how you want your order shipped. If by mail, we pay postage. If by express, we send it collect, unless you say that we shall pay charges; in that event, we will remove nearly all the soil, thereby making it the same as a mail shipment and make your selection of premiums the same as when plants are sent by mail. This is just what is done by all firms who pay the express charges.

The proper way to have plants sent you is for you to pay the express, then we send larger plants, leave on enough soil in order not to disturb the plants and add in enough extra plants to more than pay the express charges.

The amount of charges is given on each shipping tag and if the Agent tries to collect more, pay it and send the tag to us and we will refund the difference. If the amount should not be on the tag, ask your agent for the amount they were billed out of this city. Express charges, as a rule, on a \$3.00 order, are not more than 35 cents and to far away points about 50 cents, so you can figure for yourself the extra you can get for a small outlay.

N. B.—We do not pay express on fruit or tree orders, nor allow premiums on them, nor put them in your premium list. They are net and not subject to discount, so kindly keep your plant and tree orders separate. Our nurseries and greenhouses are now combined and we can send your order in one shipment instead of two as heretofore, and save you one express charge. So send us your fruit orders and you will be pleased. We can send fruit by express or freight.

OUR POPULAR 5-FOOT CANNA BED

AS SHOWN BY PHOTOGRAPH ON COVER PAGE 2.

Our Cannas are all started and grown in pots, and are ready for immediate effect.

This bed from photograph is made up of 18 Cannas, J. D. Eisele, which we consider one of the very best bedding Cannas; it grows to be about four feet, color a rich bright red. For a border we have Yellow Coleus. Price of bed complete \$2.25 by express. If by mail add 25 cents extra. Should you not want the border of Coleus, will sell the eighteen Cannas for \$1.25. Should you desire any other Cannas, please select from our list on pages 27, 28 and 29.

Many people prefer Canna beds entirely of one kind or color; therefore we offer the following suggestions for planting in such manner: Cannas should be planted in good rich garden soil mixed with half of old, rotten stable manure. Water sparingly for the first two weeks after planting; when growing freely, water liberally. Set the plants twelve inches apart each way, and if more than one kind is used be careful to plant the taller growing kinds in the center and the dwarf ones along the edge. This applies to planting in beds.

Customers can select any variety that we list. It is well to select kinds that will grow the required height you would like to have the plants attain. Note height of each kind is plainly stated in description.

The Schmidt & Botley Greenhouses as Shown by Photograph

To Our Customers and Friends:

We take great pleasure in showing you what we have accomplished in fifteen years. We have twenty-eight greenhouses 20x100, with a packing shed running through the center of them. To the above we have added this fall a cold storage plant 50x100 feet, and purchased a farm of 35 acres, which we are planting in Peonies, Iris, Hardy Phlox and other leading Perennial and Herbaceous Stock; also Field Grown Roses, which will now enable us to take care of our business as we think it should be taken care of. From now on we will be able to handle our fruit and trees from our greenhouses instead of making two shipments, and often compelling you to pay two express charges. So please note difference in our fruit which we send by mail and by express. There is a reason for this great success, and that is that we have at all times aimed to give our customers value received for their remittances, and by so doing we have been able to keep our customers on our books from year to year. Our motto is: We guarantee our stock and *guarantee satisfaction or we refund the money.*

We wish to apologize to our customers for falling behind about three weeks in getting their plants to them during April and part of May last spring and assure you it was through no neglect on our part. We did more business than we could get help to take care of, but we have made numerous changes and assure you it will not happen again. Thanking you for your former orders and hoping to be favored with them in the future, we remain

Very truly yours,

THE SCHMIDT & BOTLEY CO.

We pay postage on all shipments sent by mail. We will also pay express charges on all shipments by express, if customers will so state in their orders. In that event select your premiums in accordance with mail clubbing rates. The proper way is to have plants come by express with some soil on. Oftentimes charges will not be over 35 cents.

cessfully be attempted by anyone inexperienced in horticultural affairs. Pansy plants planted in the spring as soon as the frost is out of the ground will begin to bloom at once, and afford daily pleasure for a month before Coleus or Geraniums could be even planted. If snow should fall after planting they would not be hurt. In fact, to get the best results from Pansies, they should be planted just as early as they can be. To get best results and extra large flowers, the soil must be extremely rich—we use equal parts well-rotted manure and soil. THE BLUE ROSE

VEILCHENBLAU (Violet-Blue)

THE MOST NOVEL CREATION OF A CENTURY.
A WONDERFUL FLOWER

The introduction of such a distinct novelty cannot help but be a notable advent, and it has remained for Springfield, Ohio, the home of the Rose industry, where we grow Roses by the millions for the millions, and eighty-five per cent. of the product of the United States, to produce for the public, at a price within reach of all, the most novel creation in a flower that has been offered in years. It is nothing less than a blue flowering Rambler Rose. We know we make a startling statement when we advertise such a novelty at such an extremely low price, but when we have guaranteed genuine Veilchenblau Rose plants to send you, we have no hesitancy in making such an offer. Since the first plant was introduced extreme efforts have been made to produce a stock of this wonderful Rose in time to offer it this spring, so that the Roses might be set out in time to become well established and produce flowers in the early spring. Our efforts have met with success and we now offer you for the first time, Strong, one-year own root plants of the Blue Rose for only 25 cents postpaid.

DESCRIPTION In Veilchenblau we have an improved and glorified free-flowering Rambler, a seedling from the famous Crimson Rambler. The flowers are violet-blue in color; a perpetual source of wonder; standing out in graceful form in large clusters, individual flowers measuring from one and one-half to two inches across. This new Rose is perfectly hardy, the growth vigorous, and with its beautiful foliage is well entitled to the honor of the title, "Queen of all Roses."

OUR POPULAR "HARDY EIGHT" FOR 1910

ROSES ALL ON THEIR OWN ROOTS

Our Roses are all grown from cuttings, and are consequently all on their own roots. If they incline to sprout from the root, they should be encouraged to do so, as young, vigorous shoots produce the finest flowers. They cannot throw up wild shoots, because root and top are the same. As long as any part of the plant or root remains it will produce the same beautiful flower. We do not send out any budded or grafted Roses. Grafted Roses should never be planted by anyone not a professional Rose grower—one who knows the wild Rose and keeps it cut away. The results of planting budded stock in 999 cases out of every thousand is a failure for the reason that the wild Rose that is used for budding stock will grow and choke out the Rose you want to grow. Then the so-called home-grown Roses of mature size are mostly Roses that have been forced in a greenhouse for several seasons for cut flowers and when they are absolutely worthless for any purpose they are sold to confiding amateur Rose growers. Our advice is whatever Rose you plant, don't, for your sake, plant the Rose that has been forced until it is worthless, no matter what name it is sold under. Keep away from them.

PROTECT YOUR ROSES

Although we try to carefully explain in the introduction to each family or class whether the Roses in that class are hardy or not, the safest way is to protect all of your Roses, for it will do no harm to the hardest, and where manure is used as a covering it also serves the purpose as a fertilizer.

After the leaves have fallen give the beds a covering of manure, straw, cedar boughs, corn fodder, leaves or street sweepings—enough to keep the roots from freezing, but still not to smother the plants. In very cold localities it sometimes pays to wrap the entire bushes in straw or bend them down to the ground and fasten them to stakes driven for the purpose or cover with boards, as the principal object is to keep the plants dry and from the freezing and thawing at times of storms and sleet and rain. But the matter of protection is not such a serious problem these days, when good new Rose plants can be obtained at a very low price. Many people feel that the blossoms produced the first season are worth many times the cost of the plants, and so buy new ones each year.

Antoine Rivoire.

Anna Muller, the New Pink Baby Rambler—The shining, brilliant pink flowers are produced in great profusion, in large clusters, from June until late in the fall. Each individual floret measures two inches in diameter. The petals are twisted, making a charming effect. Price, 10 cents each, three for 25 cents; two-year-old plants, 25 cents each.

Hardy Roses—Hybrid Perpetuals

A Splendid List, Complete in Every Particular. None Better; None so Cheap.

Hybrid Perpetuals are considered the most valuable of all hardy plants. They are distinguished by their vigorous, upright growth and large, bold flowers, frequently measuring five to six inches in diameter. When you plant Hybrid Perpetuals you may be quite certain of having Roses every year without further trouble. Though called perpetual, it must be understood that they are not such early and constant bloomers as the ever-blooming Roses. The Hybrid Perpetual should not be ordered for house culture, as they are not suitable for that purpose. Do not become impatient if your plantings of these do not bloom the first season—give them a chance to become established. These Roses are especially suited to plant in all the Northern States and Territories, also in the colder parts of the States of Virginia, West Virginia, Kentucky, Tennessee, North Carolina, Arkansas, Missouri, etc.

NEW AND BRILLIANT COLEUS

Price, 5 cents each; six for 25 cents, twenty-five for \$1.00;

\$3.00 per hundred, by express, purchaser's selection . . .

COLEUS

Represent more colors in their variegation than any other plant. They are certainly the most popular of colored foliage plants. Whether grown as single specimens or in masses of ribbon lines, they are equally attractive. They are of the easiest culture and well adapted to our climate, flourishing in the hottest sun as well as displaying their beautiful colors in the shady corner where hardly any other plant would do. Plants should be set about a foot apart, so that when the size of the bed is ascertained it is easy to figure how many plants of each kind are needed in a row. All are good bedders and will stand the hot sun without losing their brilliant coloring.

Glory of Autumn—All colors of autumn combined. A most beautiful variety.

Golden Bedder—Clear yellow when well developed, edge somewhat crinkled, with center rib of lighter yellow.

Purple Prince—Dark maroon, with a purple cast, delicately veined with bright red.

Anna Pfister—(The latest novelty.) Has a dwarf growth, and has the effect of a yellow Alternanthera, but somewhat variegated.

Count Cuvier—Center fiery-red, surrounded with deep maroon, edged olive-green, serrated edge.

Fire Crest—The major portion of the foliage is a bright carmine-crimson shade, the edge is slightly marked with golden-yellow, which heightens the coloring; center of the leaves blotched with deep bronze.

Golden Verschaffeltii—This is a beautiful yellow variety, with scalloped edge, tinted delicately with bright red.

Setting Sun—Crimson, with brightest golden edge.

Verschaffeltii—Rich velvety-crimson; the best bedder.

Red Cloud—Bright red; one of the best.

Rainbow—Center clear carmine with broad chocolate border edged green.

Beckwith's Gem—A beautiful fancy variety, with large leaves, of heavy texture and finely scalloped edges. The center of leaf is dark, velvety-maroon, bordered with fiery-red; the edge is green, changing to creamy-yellow at the point of the leaf.

Hero—A deep jet black.

Miss Retta Kirkpatrick—Large white center, shaded with yellow, broad green-lobed margin; large foliage.

Mrs. Hunt—A beautiful carmine center, bordered maroon, with bright green margin.

Tam O'Shanter—Large, deep green foliage, with creamy-white center, heavily splashed carmine and chocolate. A splendid variety for pot culture.

Spotted Gem—Yellow, blotched crimson and green.

Rob Roy—Dark carmine-pink; yellow and green edge, finely serrated.

Queen of the West—Large leaf and slightly serrated; outer band of bright oxide-green with margin of bright yellow and center wedge of creamy-white; the whole covered with blotches and spots of bright carmine and deep maroon.

John Pfister—Has a dwarf growth and has the effect of a red Alternanthera; very much variegated.

Sensation—The grandest Coleus of recent years. Leaves eight to ten inches long and five inches wide; has a deep velvety texture, beautifully scalloped edge; color crimson-maroon, with center of light red.

NEW COLEUS

We have five new and distinct Coleus, which are seedlings of our own raising, which are now offered for the first time. They are oddly beautiful and quite distinct. Price, 10 cents each, three for 25 cents; set of five for 35 cents.

Keep Up With the Times

There is a growing demand for bedding stock, so start your order with a selection from our Superb List of Cannas, and select your borders according to page 5 of this catalogue. A bed of this kind of stock will give you bloom from early summer until Jack Frost lights upon them. There is no trouble connected with them, except to plant and water them, and there is nothing you can buy that will give you so much for your money as bedding plants. We have grown them in large quantities, and are anxious to supply you.

EVER-BLOOMING CANNAS

PRICE—10 cents each, three for 25 cents, seven for 50 cents, fifteen for \$1.00. In lots of fifty or more, 6 cents each; 100 for \$5.00.

Alemannia.

CHARLES HENDERSON

The standard of excellence of all crimson Cannas; bright crimson, with pencillings of golden-yellow at center. About four feet in height.

AMERICA

The first red-leaved Canna in the giant-flowered class. Height four to five feet; foliage fine glossy bronze, almost as if varnished; flowers extra large, deep orange, flamed and striped with deeper shade; distinct from any other Canna, both in foliage and flower. Height three to four feet.

The Handsome Lily-Flowered Canna,

AUSTRIA

A companion to Canna Italia; the same wonderful qualities of growth and flowers, with the exception that its wonderful large blooms are of a beautiful canary-yellow. Height five feet.

DARK LEAF BEAUTY

A good variety, very dark upright foliage, flowers small. The value of this variety is in its beautiful dark foliage. Height four feet.

BURBANK

Color rich canary-yellow, with a few carmine spots in throat; giant orchid-like flowers, the upper petals measuring fully seven inches across; it is a vigorous-growing plant, attaining a height of about four feet, with shiny leaves of a leathery texture.

ALEMANNIA

The flowers are truly gigantic in size, the upper petals spreading fully seven inches. It produces the largest flowers that have been obtained as yet in the way of a Canna. The outer petals are orange-scarlet, with a very broad golden-yellow border. The plant grown about five feet high, with numerous Musa-like glaucous leaves. We consider this variety one of the best of the Orchid type. Height five feet.

Creamy-White Canna

ALSACE

Has creamy-white flowers and blooms throughout the season in fine shapely plants, three to four feet high. Until the introduction of our new white Canna Mt. Blanc, Alsace was the nearest approach to a pure white variety. But it is still in great demand because of its low price and the magnificent and striking effect it produces when planted with other Cannas, especially in large rows and beds. Height four feet.

N. B.—Before mailing us your order read page 3, then refer to pages 90 to 95. We can send fruit and other stock in one shipment, thereby saving you express charges.

Our Cannas are All Started in Pots and Ready to Make a Showing From the Start

DAVID HARUM

Foliage dark, glossy bronze and plum; flowers borne freely in loose trusses; in color, orange-scarlet, spotted vermillion, with conspicuously protruding pistils of amber. Height three to three and a half feet.

EGANDALE

Probably the finest bedder of its color, if not of the whole list. Deep, soft red, compact spikes of medium size, a wonderful, profuse bloomer, beds of it being literally a mass of red; foliage a beautiful, rich purple. Height four feet.

ELDORADO

The flowers are of the largest size, head full, and borne well erect above the foliage, while the habit is more dwarf and compact than Madame Crozy. The color is a rich, pure golden-yellow, speckled with a red so light that the general effect, even at a very short distance, is that of a pure golden-yellow. In this we have an ideal yellow Canna, the flowers of full size, and dropping from the spike as soon as faded, leaving the bed always a mass of brilliant color. Height three and one-half feet.

FLORENCE VAUGHN

Conceded by all who have seen it to be the finest yellow spotted Canna. Flowers very large, of the most perfect form, with broad, overlapping petals, nicely rounded at the ends. Color a brilliant yellow, spotted with bright red. A strong grower and flowers very freely. Height four feet.

ITALIA

One of the wonders of recent introduction, with large, Musa-like foliage. The flower spikes produce a number of extraordinarily large flowers of a beautiful scarlet color, edged with yellow, a plant that should be in every collection. Height five feet.

J. D. EISELE

Bright vermillion-scarlet, overlaid with orange; a fine bedder. Height three and a half feet.

MLLE. BERAT

This is a pink variety of French origin. Entirely distinct from any other sort. It is much the darkest of all the pink Cannas, being dark carmine-pink. Heads of blooms are held very erect and well above the foliage. A showy, effective bedder. One of the finest introductions. Height four feet.

MADAME CROZY

The color is a brilliant vermillion-scarlet, bordered with deep golden-yellow. The flowers are borne in great clusters, and in such profusion that they crown the plant with a blaze of glowing color. Height three and one-half feet.

MISS BERTHINE BRUNNER

Large, open panicles of pure yellow flowers, minutely spotted with orange-scarlet. Height four feet.

The Mammoth-Flowering New Canna,

MRS. KATE GRAY

One of the largest-flowered Cannas ever introduced. Flowers round and full, of a clear wine color, beautifully suffused with gold. Notwithstanding their size, the flowers have a great deal of substance and are very showy and effective. Besides its fine flowering quality, its broad green foliage gives Mrs. Kate Gray another point of merit which makes it one of the best all-around Cannas to date. Height five feet.

NIAGARA

One of the best of the low-growing variegated Cannas. Color rich deep crimson, with a wide, irregular border of deep golden-yellow. Three feet.

PAPA NARDY

Very large, rich currant-red, with a purplish sheen. Four and one-half feet.

PARTENOPE

Flowers of extra large size, the broad, wavy petals glisten like silk; the prevailing color is orange, delicately streaked with scarlet tints, and suffused with salmon; early and a free bloomer, green foliage; five to six feet in height.

PAUL MARQUANT

The individual flowers are large, and the flower spike very large, each flower standing out separately by itself. The color is very hard to describe. It might be described as a bright salmon with a carmine tint. Height four and a half feet.

PENNSYLVANIA

We ask particular attention to this grand American Hybrid Orchid-flowering Canna, because in addition to being one of the largest and most magnificent varieties ever introduced, it is the only pure deep red flowering sort in the Orchid-flowering class. The flowers are immense, often seven inches across, with petals two and a half inches broad, borne in splendid branching spikes. A tremendous bloomer; begins quickly, keeps it up. This Canna was the most magnificent of all those grown on our grounds here last summer. Its grand size, pure, deep scarlet color and profuse blooming habit place it at the head of Orchid-flowering Cannas to date. Height six feet.

PRESIDENT MCKINLEY

Pronounced by all the best dwarf crimson bedder introduced. Color a very deep crimson-scarlet, the nearest approach to the color of the Alphonse Bouvier of any Canna we have. It is an early, constant and immensely profuse bloomer. Height two and a half feet.

QUEEN CHARLOTTE

(New German Canna.) A most distinct rich crimson-scarlet, with wide gold border on every petal. A very handsome plant, medium in height, compact grower; broad, green leaves. It is a profuse bloomer, and the flower spike, which is full and well formed, stands well above the leaves, yet not so tall as to appear drawn or ungainly. Height two and one-half to three feet.

SECRETAIRE CHABANNE

Distinct and pleasing salmon; very free; a fine bedder. Three feet.

SHENANDOAH

The first of the bronze-leaved varieties with a pure pink flower. The plant grows to a medium height, having broad, chocolate-colored foliage with a bronze-metallic luster. The flower is large and of a very pretty shade of pink, making a pretty contrast with the bronze foliage. A fine bedding variety. Height four feet.

SOUV. D. ANTOINE CROZY

A Canna we can recommend as one of the best we have today. Its color is an intense scarlet, bordered with a band of deep golden-yellow. The foliage is broad and deep green. It grows about three to four feet in height, making a fine variety for the border of beds.

We will send any of these colors, but the selection of variety must be left entirely to us. Remember that our Cannas are started plants, not dormant roots, as are often sent out, and will come to you in good growing condition.

For a border to the Canna bed we would recommend red Salvia or Coleus (red or yellow). Salvias should be planted ten inches apart and the Coleus eight inches apart.

Price of Cannas for bedding—Fifteen for \$1.00, except those mentioned on this page, or 6 cents each if fifty or more are ordered at one time.

Beautify Your Lawn With a Bed of Cannas “THE KING OF BEDDERS”

Nothing makes a finer appearance on a lawn than a bed of Cannas. It matters not how large it is or indeed how small; if you have a suitable spot that gets the sunshine, plant a bed of Cannas and enjoy the pure beauty of their freshly opened flowers every day, from June till frost. So great is the variety of sizes and colors that there seems no limit to the combinations and places in which these Cannas can be successfully used.

For example, the dwarfier kinds may be planted in single or double rows along the walk, or side of the porch; others may be banked against the side of a building or in front of a hedge or a background of shrubs (always placing the shortest kinds in front), or used as a hedge plant they prettily mark a dividing line where no real barrier is needed, but the best effect of all is produced when many plants of a kind are placed together in masses or large beds, round, square, oval or oblong, or a triangle bed of glowing color for some suitable corner.

Directions for Laying Out Circular Beds

Always use tallest growing varieties in the center, and then carefully grading each succeeding circle, using dwarf kinds for the outside. Plant one Canna in center of bed, next six Cannas fifteen inches apart in a circular row fifteen inches from center. For each succeeding circle use six more Cannas than were used in the previous circle, and make it fifteen inches farther away from the center. Measure your beds, and you can soon tell just how many plants you need.

If you will simply state the color and number you want for each circle or straight line, as the case

CARNATIONS—THE DIVINE FLOWER

For beauty of flower and color, ease of culture, certainty and freedom of bloom, together with exquisite fragrance, this is well called the "Divine Flower." Plants in the open ground quickly make large specimens, and when brought indoors in the fall, produce an abundance of flowers throughout the entire winter. Carnation blooms are expensive. Don't buy them—grow them yourself. Pinch the plants back frequently during the growing season.

We offer on this page twelve of the best Carnations. Price 10c each, three for 25c; any seven for 50c

Winsor

This is a clear silvery-pink—a shade between Enchantress and Mrs. Thos. W. Lawson—and much more beautiful than either. In fact, it is just the shade that we have all been trying to get. The stem is just right. The flowers are considerably larger than the Lawson and much better shaped.

Enchantress

A very pleasing shade of light pink, deepening towards the center. When fully developed, over four inches in diameter; very attractive and fine form. Stem is strong and stiff; both out of doors and in the house the growth is ideal; very healthy and of vigorous constitution. Very early, free and continuous. Needs no special culture to develop its magnificent blooms.

White Enchantress

This is a pure white sport of Enchantress, which is at once the most popular and most profitable Carnation grown today; and this on account of its size and stem and freedom with which it blooms. White Enchantress is identical in every respect but color. Those who desire quality as well as quantity will find it in White Enchantress.

Rose-Pink Enchantress

A lovely rose-pink shade of color put on by the old favorite "Enchantress." The parent's practical, wide-awake habit of growth and trustworthy blooming qualities have always made it popular, and this new coloring but adds greatly to an already first-class reputation.

Harlowarden

Very strong, free grower; extra long stems; large flower, of bright crimson with shadings of scarlet; very free.

White Cloud

This variety is the largest white Carnation in cultivation—often measures four inches in diameter. The flowers are of the purest white, with petals of great substance, making it one of the very best.

Golden

A light yellow, very handsome, with strong stem.

Melody

Pure flesh-pink, some lighter than Enchantress

Victory

Exceptionally satisfactory and useful as a cut flower, owing to its great stability, its nice long stems, and the prodigality of its bloom. Color, brilliant scarlet.

The Beacon

A splendid new red that blooms throughout a long season. Flowers are gracefully formed, and will average from two and three-quarters to three inches in diameter. Color scarlet, with a brightening dash of orange.

Variegated Lawson

Closely bearing out the admirable Lawson type in all respects, the color being a pretty commingling of pink and white.

White Enchantress.

Mrs. Thos. Lawson

It has created quite a sensation on account of its wonderful size and beautiful color—a deep cerise pink approaching very near to a brilliant carmine. The habit is strong, free-growing, very vigorous, producing flowers averaging over three inches in diameter.

Mrs. Thos. Lawson.

The form of the Golden Wedding is unique; the outer petals droop downward in picturesque irregularity; the center of the flower is built high, with broad petals irregularly overlaid, so that, although the flowers are large, they are not heavy, solid-looking, like many others. It is an ideal exhibition variety, with flowers of immense size, measuring twenty-two inches in circumference and of great depth. Flower is a magnificent Japanese incurved, with lower petals reflexed, and not showing any center. Besides its immense size and beautiful shade of clear yellow, another point in its favor is its almost faultless stem and foliage, growing fully up to the flower.

CLEMENTINE TOUSET

Color a glistening white, sometimes tinted pearl. Petals incurved and very broad. Exceptionally easy grown, making it a fine variety for the amateur.

MRS. GEO. F. BAER

(Yellow Jerome Jones)—Flowers very large, with incurved petals, making them nearly globular in form. A pure golden-yellow, tinted with bronze on under side of petal.

MRS. COOMBES

An extra fine very early pink variety of the largest size, blooming just after Glory of the Pacific and before Pink Ivory. Color beautiful rose-pink, resembling Vivand Morel in color and also in style, but the petals are broader. It is a fine dwarf grower. First-class pink Chrysanthemums are scarce, and this variety will prove exceedingly valuable on account of its earliness and large size.

WHITE BONAFFON

One of the most useful of the white varieties. Color pure snow-white. The flower forms a perfect ball when in full bloom. It is a dwarf grower, with heavy foliage. Price, 15 cents each.

WHITE COOMBES

Those growers who value so highly the grand early pink, Mrs. Coombes, will be delighted with its white sport offered herewith; extremely valuable as an October white where big, fine blooms are needed.

CULTURAL DIRECTIONS FOR CHRYSANTHEMUMS WHICH, IF FOLLOWED, WILL INSURE SUCCESS

When to Plant—The Chrysanthemum is easy to please on this point. Any time after the ground can be worked, even up to June 20th, will give you good blooming plants in the fall.

Soil—Dig the ground deep; put in quantities of manure. The Chrysanthemum is a gross feeder; if fed well, the flowers will be large and the plant strong.

Disbudding and Stopping—When your plant is eight inches high, cut back to a height of six inches. Allow four shoots to grow from this main trunk. When these four shoots are four inches high, pinch out the terminal bud, and save three or four branches that will spring from each of these limbs. Allow these last branches to attain a height of nine inches, then pinch back for the last time. Allow one bud (flower) to each stem, and that a terminal bud.

When to Lift—In localities subject to heavy frosts in October and November, plants should be lifted into large pots or boxes by September 1st. After lifting, drench thoroughly and never allow them to suffer for water. Give manure water, if possible, once a week. If protected from frost by sheeting they need not be brought into the house till well into October, and when brought in, place in a room without fire, give plenty of air when not frosty. In cold climate winter in cellar.

Black Aphides—Nothing destroys this troublesome insect so easily as clean cold water dashed on forcibly with a syringe.

Each year the taste for Chrysanthemums becomes more exacting, and to meet it we offer only the finest exhibition and cut-flower varieties—sorts that are noted the country over.

Gorgeous Bedding Tuberous-Rooted Begonias

Have you tried our Suberb Bedding Begonias?

If you have not, you should certainly plant at least a few this spring.

THEY ARE GRAND

The tuberous-rooted Begonia is the fashionable plant of the day, and richly does it deserve its honors. The very handsomest of our summer-blooming plants, flowering throughout the season, and as fine and varied in their color as the Geranium family. They are splendid bedders, delighting in a light soil of woods earth, very old cow manure and sharp sand. See that the bed is in partial shade and you will be delighted with the result. In the South, or where they cannot be planted in the shade of a house, a covering of burlap or canvas, some six or eight feet above them, merely to throw off the sun's rays, will allow them to come to absolute perfection, but they must have plenty of light and air. Do not allow them to become dry, and during hot weather they will take two waterings a day. When through flowering they can be dried off, shaken free of earth and wrapped in cotton until February or March, when they may be started again. Single separate colors, white, scarlet, pink and yellow, 8 cents each, two for 15 cents, eight for 50 cents. Double, separate colors, white, scarlet, pink and yellow, 12 cents each, three for 30 cents, six for 50 cents.

Bed of Tuberous-Rooted Begonias.

BEGONIA GRACILIS LUMINOSA

This beautiful new Begonia is the latest novelty in the Begonia family. As the name implies, it is one of the most symmetrical and yet graceful plants we have ever grown; very strong and robust, but still keeping its shape so as to make a most attractive plant. It has proved the most free flowering of all Begonias, always in bloom—spring, winter and summer. The flowers, when first opening, are a bright cherry, changing to a clear coral-red. Its foliage resembles a little that grand old variety Vernon; rich glossy green, often shaded deep bronze. This novelty is one of the best of bedders, thrives everywhere, and is destined to become the leader of all Begonias. Price, strong plants, 15 cents each; two for 25 cents; three for 30 cents.

PRESIDENT CARNOT

A remarkably strong-growing variety; foliage very large; flowers beautiful coral-red, in large pendent panicles, similar to Rubra, but very much larger. A great acquisition; one that is sure to succeed under all circumstances. Price, 10 cents each.

New Begonia VERNON

This elegant new variety is of unusual merit as a bedding sort, flowering fully as freely when planted out as when grown as a pot plant. It begins flowering when first planted and continues throughout the whole season until stopped by frost. Foliage rich, glossy green, often shaded deep bronze. Flowers at first opening are a deep red, changing to a beautiful clear rose in the fully opened flower. It thrives everywhere and is destined to become one of the most popular of bedding plants. Price, 10 cents each.

ALBA PERFECTA GRANDIFLORA

This variety closely resembles the well known Begonia Rubra in foliage and growth, with beautiful pure white blossoms. Price, 10 cents each.

These are without doubt the finest Tuberous Rooted Begonias yet introduced. They are an improvement over the Tuberous type offered heretofore, having the same brilliant colors, but the flower has a fringed edge similar to the Carnation. They make handsome bedding plants, flowering all summer, and for pot plants are unsurpassed. This is the first time these bulbs have ever been offered in America and are certain to create much favorable comment. We have them in five colors:

Begonia Crispa—Double fringed. Price, 10 cents each; set of five for 40 cents.

Begonia Cristata—Single fringed. Price, 15 cents each; set of five for 60 cents.

N. B.—Please do not include our small fruit and ornamental stock in your premium column. The prices are net and not subject to discount.

The flowers are borne in large, drooping clusters; very large, long and graceful. Price 15c.

DECORATIVE FERNS

THESE beautiful plants for home decoration vie with the Rubber plants for first place in the esteem of flower lovers. They are finely cut and sometimes oddly shaped. Fronds have a graceful effect produced by few other plants. With practically the same care as given flowering plants they do exceedingly well in the parlor and conservatory. The Ferns of the Pteris family do as well as the Sword Ferns; the best varieties for the house are to be found in the Pteris family. The Nephrolepis family, of which the well-known Boston is a member, has furnished us so many beautiful species of late years and are succeeding so well that this family is steadily growing in popularity. The varieties we list on this and the following page are all recommended for indoor growing in pots as specimens or for ferneries for table decoration. Ferns should be planted in a good light soil with some sand and leaf mold added; see to it that wherever planted they have good drainage. Their diversity and gracefulness of foliage make them much valued as plants for vases, baskets or rock work, or as specimen plants for parlor or conservatory. Keep them out of the direct sunlight and water carefully, that the delicate roots lying near the surface may never become dry.

Whitmanii.

The Wonderful New Fern, Baby's Breath

Nephrolepis Amerpohlil—This is the newest and grandest of all Ferns. It is so delicately fine and fluffy in foliage that it has been given various names, among them "Baby's Breath," indicating that its fronds are so very fine and delicate that a baby's breath would set them in motion. Some call it the Philadelphia Lace Fern. Whatever name you call it by, it is a beauty. It was raised by a Mr. Amerpohl, of Janesville, Wisconsin, and named after himself. Our reputation for it, that it is the finest of all Ferns. No Ostrich Plume can compare with it in fluffiness. Price, 20 cents; fine specimen plants, 40c.

OUR SPECIAL OFFER

IN CHOICE FERNS AND PALMS

For the benefit of those of our patrons who admire Palms and Ferns we make the following extremely liberal offer:

FOR ONLY \$1.00

We will send by express four distinct Ferns, all large, strong plants that will make beautiful specimens this summer, and three handsome Palms, all distinct and all with character leaves out of four-inch pots.

The varieties must be strictly our own selection, but will consist of the very best varieties that grow.

The New Ostrich Plume Fern,

Nephrolepis Piersoni

An entirely new form of the famous Boston Fern. The fronds grow in the most luxuriant manner, the pinnae subdividing, making miniature fronds, which are superimposed on the main fronds, looking as if two, or even three, were condensed in one. They are graceful beyond description—feathery, plummy, nothing describes them better than "Ostrich Plumes," which they very much resemble. The fronds arch over in wavy irregularity, delightful to the eye. Price, strong young plants, 10 cents each, three for 25 cents; large, handsome plants from four-inch pots, 20 cents each; extra fine plants, 35 cents each.

New Nephrolepis Whitmanii

The newest and finest Fern yet introduced

This Fern made its first appearance last fall, not having been offered until then by any firm. It is the best Fern of the Boston type yet introduced. It is somewhat similar to the Fern Tarrytown, but much more compact and shorter in its growth. Price, fine young plants, 10 cents each; strong, three-inch pot plants, 20 cents each; extra fine specimen plants, 35c each.

Baby's Breath.

Nephrolepis Scotti.

Nephrolepis Scotti

Of much dwarfer and bushier growth than the Boston Fern. The fronds droop gracefully, and are not as long and coarse as the Boston. It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. Price, strong plants, 15 cents each; large plants, 35 cents each.

The Old Reliable Boston Fern.

The Boston Drooping Fern

Nephrolepis Bostoniensis.

Much has been heard of this Fern during the past year; of the same form as the Sword Fern, Nephrolepis Exaltata, but has larger and broader fronds; a more drooping habit. In well grown specimens the fronds attain a height of six to seven feet. Fine for hanging pots and baskets. Price, 10 cents each; large plants, 20 cents each; extra fine plants, 35 cents each.

The Wonderful Japanese Fern Ball, Davallia Bullata Nagaha

This novelty imported from Japan. we take great pleasure in introducing as one of the best and most satisfactory house Ferns ever offered. This ball consists of Fern roots about the size of a pencil, woven outside and around a ball of moss. These roots produce beautiful sprays of Ferns from eyes or buds at nearly every inch of their length. Thus the whole surface of the ball soon becomes covered with Fern sprays. They may be suspended in any part of the room or grown on a stand or table.

Directions for Starting—Place ball in water for fifteen minutes and then suspend in any desired position; repeat every two days until growth is started, after which sprinkle occasionally as required. To use in Fern dish, cut ball in halves, placing flat side down, thus getting two dishes of beautiful Ferns. The Fern ball may be allowed to dry up at any time and set away, and started again by watering as before.

Price, for dormant large size, 60 cents each by express; smaller size, 40 cents each, by mail, postpaid.

Nephrolepis Superbissima

New. Offered for the first time. A unique variety, different from all others and really in a class by itself. It makes a dwarf, compact growth, the fronds being very dense, firm and rigid, and of a deep green color. Price, handsome plants, 50c each.

Nephrolepis Piersoni Elegantissima or Tarrytown

This is a sport from the Pierson Fern, in which the plummy peculiarity of the original form is even more distinctly developed than in the original; the plant is of much more compact habit, growing only one-half as tall, but with the fronds nearly twice as wide, making it a much more desirable plant for all purposes. Price, nice young plants, 10 cents each; larger plants, 25 and 35 cents each, postpaid.

Frond of Elegantissima.

A PAGE OF RARE FOLIAGE AND FLOWERING PLANTS

Ficus Elastica.

FICUS ELASTICA (India Rubber Tree)

Very large, smooth, leathery leaves, evergreen foliage. Generally esteemed one of the finest house plants grown, the plant attaining a large size and tree shape. Each new leaf is enclosed in a long, coral-red envelope, looking like a great red flower bud. Price, fine plants, 35, 50 and 75 cents each.

Camellia Japonica.

The Royal Plant, CAMELLIA JAPONICA

The royal family of greenhouse plants. Leaves glossy-green and flowers of the most exquisite beauty and waxy texture. From pure white to crimson in almost endless variegation. The pure white ones are generally prized above the colored varieties. Their culture is nearly related to that of the Azalea, but their success is more certain. Requires shade and moisture throughout the hot season. Their time of blooming is winter and early spring. Requires a moderate and uniform temperature with as little artificial heat as possible. Price, for very large, strong plants, by express, 75 cents each.

N. B.—Our Camellias are imported from Holland, and while we exercise great care in sending them true to name, they sometimes become mixed through no fault of ours, and sometimes they will vary a light shade as to color. Consequently under these circumstances we cannot replace them on this account.

ARAUCARA EXCELSA (Norfolk Island Pine)

Various names have been selected for this grand plant to properly convey to the mind the appearance of it. Some have called it the "Christmas Tree Palm," from its resemblance to a Christmas tree; others have called it the "Star Palm," because the leaves are arranged to form a perfect star, but no descriptive name can give adequate idea of its beauty. It has deep green feathery foliage, arranged in whorls, rising one above the other at regular distances; its symmetry of form, grace and beauty of foliage are unequalled in the vegetable kingdom. It is easily grown in the house and is highly ornamental. Price, nice plants, three and four tiers of leaves, 75 cents each; larger size, \$1.00 each. Must be sent by express.

CROTONS

The Crotons are among the finest decorative foliage plants known. Leaves are more or less veined and margined, sometimes entirely variegated with shades of yellow, orange and crimson. Some have long, narrow leaves, arching gracefully, fountain fashion, others broad and short—dark leaved. Some recurve very much, others twisted, corkscrew-like. Crotons love heat, sunshine and moisture. We will send you three choice kinds at 15 cents each, two for 25 cents.

We have a number of the best flowering sorts that will flower finely the coming winter, both double and single flowered. The plants we offer are magnificent specimens—the finest you have ever seen, and all will bloom this year. Price, fine, large plants, thirty to thirty-six inches in circumference, 75c each; six for \$4.25; extra large plants, forty-five to fifty inches in circumference, \$1.00 each.

FRAGRANT HELIOTROPES

PRICE, 10 CENTS EACH; TWO FOR 15 CENTS

Picciola—Rosy-violet, indeed almost red, with a distinct white center showing upright growth producing immense heads of flowers well above the foliage; flowers do not have that drooping appearance that is so much against some of the other varieties.

Notice

We would call the attention of our patrons to the fact that some are sending out our American Wonder Lemon under the fictitious name of "Ponderosa." When ordering this marvelous Lemon, send to us. We introduced it, we named it, and we have by far the largest stock in the world of this splendid Lemon.

This Truly Wonderful Lemon

was introduced for the first time to the public in the spring of 1899. Since that time we have grown and sent out thousands to all parts of the country, and the reports we have received from our patrons in all quarters as to its productiveness and size is very flattering.

The American Wonder is a True Ever-Bearer

Blooming and fruiting at the same time. Think of sixty Lemons setting from one branch of bloom on a small tree. It has bloomed and set fruit on the naked trunk of the tree. There is no Lemon in the world to compare with it.

Its Culture

Plant it in any good garden soil in a large pot or small tub, and keep it in the house or cellar during the winter. You can set the tub and plant out on the piazza or lawn when the weather gets warm. Give plenty of water while growing. No plant is easier to grow.

The American Wonder on Its Own Roots

We guarantee the trees to produce the same large fruit. No budding or grafting.

Rock Hill, S. C., November 2, 1909.

Schmidt & Botley Co., Springfield, Ohio.

Gentlemen:— The American Wonder Lemon plant that I ordered from you eighteen months ago now has two lemons measuring twelve inches in circumference each. They are beautiful. I am indeed very proud of my plant. They are considered a curiosity by everyone that has seen them.

I have one question to ask. Are they eatable? They are now turning.

Yours truly,
NAN JOHNSTON.

A Novelty of Decided Merit Botanically Described as

"Ceratonia Siliqua"

Commonly Known as "Candy Tree" and "St. John's Bread"

It is a very pretty evergreen tree with dark, glossy green leaves, resembling somewhat the laurel. It bears freely a wonderful fruit, very much like a mammoth bean pod, of a dark chocolate color, which, when ripe, is edible, being deliciously sweet, with a decided chocolate flavor, from whence it derives its name of Candy Tree. It is a native of southern Germany, where it grows luxuriantly. Is hardy in the South where it will make a very handsome ornamental tree for outdoor planting. In the North it makes an exceedingly attractive plant for the house, as it grows finely in pots, making very shapely plants in a short time. Does well in either shady or sunny position. Price for nice well established plants ten inches high, 10c each; a larger size, very nice plants, 25c each.

We have thousands of testimonials like these, and we guarantee the Lemon to be all we claim it. No home is complete without one.

SUMMER FLOWERING BULBS

GLADIOLI

Gladiolus, or Sword Lily

Set the bulbs from six to nine inches apart and about four inches deep. Plant from middle of April to first of June. Our Choice Collection of Dahlias

All Varieties, New and Rare Colorings

The Dahlias are well known and much admired plants growing from tender tubers and adapted to bedding in summer. The flowers have a wide range of color, mostly scarlet, orange, yellow, crimson and various shades of other colors. The most suitable soil for the Dahlia is a rough, rich loam, to which has been added plenty of manure and some sand, and spaded into a good depth. Plenty of water is required to keep them in good shape and to produce good bloom, and during a very dry summer the watering must not be neglected. When the frost kills the stalks in the fall, take up the tubers and store in a dry place, covering with a dry earth to prevent them from starting.

Price for any one variety of Dahlias on this page, strong roots, 15 cents each; any two for 25 cents; \$1.35 per dozen.

Hardy Perennial Plants

Suitable for

Cemetery, Lawn and Garden

Hardy perennials are those plants which die down in winter, but start again in the spring from the root, lasting many years and flowering every year. Never before have they been so popular, and from present indications of a desire for hardy plants, the demand for them will continue to increase, which will make them as popular in the United States as they have been in the horticultural centers of Europe for many years. Some are very useful for screens, some for hedges, rockeries, steep banks and terraces, others for bedding, edging and bordering and cemetery planting; then again others are fine for cutting to be used for table decorations.

Cultivation is of the simplest, beginning with any good garden soil for a foundation, which may be enriched with any good fertilizer, such as well decomposed manure or bone meal, deeply dug, well pulverized, in which the plants should be set as early in the season as possible, so as to enable them to become well rooted and established before hot, dry weather sets in, keeping the ground well stirred, and where it is not convenient to water the beds during hot, dry weather, a mulch of any loose material which will keep the soil from baking will be found beneficial.

OUR FLOWER SEED DEPARTMENT

WE HAVE used the greatest care in obtaining our flower seed, and those we offer you are absolutely fresh, being grown under our personal supervision or imported from the best foreign seed growers. Failure in getting satisfactory results from seed planting may be attributed to the manner in which the seed is sown, rather than the lack of germinating power in seed, and seedsmen are unjustly censured when the fault lies in the cultivator and not in the seed. Most flower seeds germinate well in a fine, sandy loam, partly protected from the sun. Heat and moisture are the two essential points to start life in seeds. A general and fatal error is to start the seed too deep; small seeds should be barely covered with fine earth; large seeds by about half an inch. After sowing, the ground should be watered with a very fine sprinkler, regularly. Many seeds are killed by drought.

Sowing of Seeds—Spade the soil in the seed bed to a good depth, work it over and over with the spade in order to mash the small clods. Sow the seed in drills or broadcast, according to the kinds, covering carefully and lightly, there being more danger in covering too much than not enough. Never allow the seed to remain in dry soil. For seeds that require an early start, to secure blooms before frost, sow in shallow wooden boxes—in good garden soil. Cover the seed very lightly, keeping the box in a sunny window, covering the box with a pane of glass until the seeds begin to sprout, but never allow the soil to become too dry.

Transplanting of Seedlings—Do not allow the little plants started in the boxes to grow too tall before transplanting. Care should be used in watering the seedlings well after planting and to protect from the sun for a few days with light paper.

The Aster is one of the most popular and satisfactory garden flowers now grown. They are so simple that a child can operate them just as successfully as an experienced poultryman, and on this fact hinges the secret of their wonderful success. Each incubator is sold with an absolute guarantee that allows the purchaser to try it for forty days and return it to our factory in case it should not prove entirely satisfactory. There are no strings to this guarantee—the incubator must prove satisfactory in every way or you send it

BUCKEYE BROODERS

Here is a brooder that will take care of little chicks better than any hen. It takes care of the chicks as soon as they are hatched, and not only broods them and keeps them warm but also protects them from storms, cats, rats or hawks. It has a galvanized steel roof, and the whole arrangement makes it absolutely storm proof, so that it can be used outdoors every day in the year. It will accommodate fifty to seventy-five chicks comfortably. Shipped from the factory to any part of the world.

Buckeye Brooder No. 2, \$6.00.

We sell another brooder that is built for indoor use only. As it has a wooden roof instead of galvanized steel, the chicks would suffer in case of storm. It does exactly the same work as Brooder No. 2, and when operated indoors or in a protected place will give entire satisfaction. This brooder will accommodate fifty chicks. Shipped from the factory to any part of the world.

Buckeye Brooder No. 0, \$4.00.

Strawberries

The blossoms of those marked with (P) are destitute of stamens, and are termed pistillate, and unless a row of a perfect flowering variety is planted at intervals not exceeding about a rod, they will produce imperfect fruit and but little of it.

Our land is especially suited to the development of strawberry plants, giving us extra fine crowns and roots, our plants weighing two or three times as much as many sent out. Our stocks are pure, each kind kept by itself and cultivated entirely for the production of plants. They are carefully graded, handled and packed, certain to give the best of satisfaction.

Dip the plants in water as soon as received, and bury the roots in moist, shady ground till you are ready to set them out; neglect for an hour or so is often fatal.

Price, except where noted, ten for 20 cents; \$1.00 per hundred; not less than twenty-five of a sort at hundred rates.
